Character images (preprocessed: denoised + CLAHE)

#1

Per-character predictions

#	Class (folder)	Group	Unicode	Confidence	Alternatives
1	cons:ch	Consonant	U+0C1A	92.1%	v 0.2%; bh 0.2%

The stroke-gated fusion model weighs appearance features against stroke features (skeleton, stroke width, edges) per character: #1 95% appearance.

Handwritten-character recogniser: the output is a machine prediction and may contain errors. Verify important text manually.
